ABOUT ME

A highly motivated and detail-oriented Artificial Intelligence and Data Science graduate with a strong foundation in Python, SQL, Machine Learning, Data Analysis, and Data Visualization. Passionate about solving real-world problems through technology and continuously improving technical skills by building practical projects. A quick learner with strong analytical and problem-solving abilities, eager to contribute to a collaborative team while growing as a software professional.

EDUCATION

MEENAKSHI SUNDARARAJAN ENGINEERING COLLEGE

B.Tech Artificial intelligence and data science 7.9/10

2021 - 2025

ADHIPARASAKTHI MATRIC.HR.SEC.SCHOOL

11th & 12th-80%

2019 - 2021

SKILLS

Technical Skills

- **Programming Languages:** Python, SQL
- **Data Analysis & Visualization:** Pandas, NumPy, Matplotlib, Power BI
- **Machine Learning:** Scikit-learn, Data Preprocessing, Model Evaluation
- **Database Management:** MySQL, PostgreSQL
- **Version Control:** Git, GitHub
- **Development Tools:** VS Code, Jupyter Notebook, Streamlit
- **Core Concepts:** Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks

WORK EXPERIENCE

Assistant – Dr MGR ARI NAVAL Aerospace Innovation LLP, Chennai
Developed a Face Recognition system using Python, Raspberry Pi, and Drone Technology.

Assistant – Cybertsz, Chennai
Worked on UI/UX website design and adapted design concepts for web & social media.

Analyst Intern – Labmentix, Chennai
Performed Exploratory Data Analysis (EDA) on large datasets and presented insights.

PROJECTS

Telecom Complaint Analysis System

- **Technology used:** Python, NLP, Machine Learning
Developed a complaint classification system for telecom customer feedback.
- Performed sentiment analysis to categorize complaints as positive, negative, or neutral.
- Applied NLP techniques and machine learning models for automated text classification.

<https://github.com/karthick26-hub/telecom-based-AI-intelligence-system.git>

Phonepe Transaction System

Technologies Used: Python, SQL, Streamlit

- Analyzed PhonePe transaction data to identify payment trends and user behavior.
- Processed large datasets using SQL and developed an interactive Streamlit dashboard for data visualization.

https://github.com/karthick26-hub/phonepe_insights.git

Luxury House Price Analysis

- **Technology used:** Python, Power BI
Conducted exploratory data analysis on luxury housing datasets.
- Identified factors influencing property prices using Python.
- Designed Power BI dashboards to visualize pricing trends and market insights.

https://github.com/karthick26-hub/house_sales_analysis.git

Amazon Music Clustering

Technologies Used: Python, Scikit-learn, Machine Learning

- Clustered songs using audio features with unsupervised machine learning.
- Preprocessed data and engineered features for accurate music categorization.

<https://github.com/karthick26-hub/amazon-music-clustering.git>

Comment Toxicity Detection System

Technologies Used: Python, Scikit-learn, Pandas, NumPy, Streamlit

- Preprocessed text using tokenization, stop-word removal, and vectorization for toxicity classification.
- Developed a machine learning model to detect and classify toxic comments.
